Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-41 are, drawn to a composition comprising two or more agents encapsulated into the liposomes.

Group II, claim(s) 42-85 are, drawn to a method of treatment of cancer.

Group III, claim(s) 86-98 are, drawn to a method of preparation.

2. The inventions listed as Groups I--III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: Group II is specifically drawn to treatment of cancer and one would not use a composition containing cosmetics or insecticides for such a treatment. The technical features are different. The composition claims in Group I are specifically drawn to already prepared to liposomes containing two or more agents and thus specific compositions whereas the method of preparation is not specific.

3. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

a) combination of the two or more agents comprises two or more drugs cytotoxic to tumor cells (claim 2).

b) combination of the two or more agents exhibits activity against parasites and insects (claim 3).

c) combination of the two or more agents exhibits activity against skin penetrating parasites and insects (claim 4).

d) combination of the two or more agents is for application to nails, hair, skin or lips and cosmetic (claims 5 and 6).

e) composition comprising one or more nutritional products (claim 7).

f) combination of two or more agents of drugs, nutritional supplements, vitamins, minerals, enzymes, hormones, proteins and peptides (claim 8).

g) composition comprising one or more appetite suppressants (claim 9).

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

4. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The compositions

are different, though the carrier is the same. One would not use composition containing insecticides for cosmetic treatment for example.
